Etablert februar 1967.

Tenants of
Husejordet - Andrenbakken

Monday 31 October 2011

Regarding: A New Waste Disposal System

Your new waste disposal system is now in place. **Please read the information from the municipality carefully.**

Container for 'Household waste', which will be emptied every week. This is for household waste only **not** furniture, electronic items, cookers, refridgerators, etc.

Containers for 'Food waste'. These will be emptied every week.

The small green plastic box that has been delivered to your door with plastic bags is to be used for food waste. Make sure the **bag has no holes** when placing it in the food waste container. Do not throw the bag into the container as this will result in open deterioration of food inside the container. If this occurs, the area will have an unpleasant odour.

Container for 'waste paper', which will be emptied every 3 weeks. (See the collection schedule).

Make sure that all paper and cardboard boxes are flattened to take up as little space as possible.

The large plastic bags that have been issued are to be filled with plastic items. These will be collected every three weeks. Make sure that the filled plastic bags are in your own home and put them outside the day before collection day.

It is up to each tenant to keep the waste collection area tidy. Make sure that everyone can access the containers.

Please read the information from the municipality carefully.

Best regards,

Blakstad Hospital Housing Foundation
